Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

I grew up in Vallejo and have fond memories of visiting Benicia State Park and of a walk-a-thon from downtown Vallejo to Benicia and back. Although many things have changed since the 70's in both cities I hope you will draw the line at allowing Valero to bring its poisonous plan to Benicia.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

COMMUNITY DEVELOPMENT

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

RECEIVED
OCT 30 2015
CITY OF BENICIA
COMMUNITY DEVELOPMENT

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.
