Expected Peak Day Concentration:		0.061		0.067		0.070
California Year Coverage:		96		98		98

### Notes:

Eight-hour ozone averages and related statistics are available at Vallejo-304 Tuolumne Street between 1976 and 2012. Some years in this range may not be represented.

All averages expressed in parts per million.

An exceedance of a standard is not necessarily related to a violation of the standard.

Year Coverage indicates the extent to which available monitoring data represent the time of the year when concentrations are expected to be highest. 0 means that data represent none of the high period; 100 means that data represent the entire high period. A high Year Coverage does not mean that there was sufficient data for annual statistics to be considered valid.

■ means there was insufficient data available to determine the value.

### Available Pollutants:

8-Hour Ozone | [Hourly Ozone](#) | [PM2.5](#) | [PM10](#) | [Carbon Monoxide](#) | [Nitrogen Dioxide](#) | [State Sulfur Dioxide](#) | [Hydrogen Sulfide](#)
