# Days Above the Standard:		0		0		0
Expected Peak Day Concentration:		2.20		2.48		2.56
Year Coverage:		91		97		43

Notes:

Eight-hour carbon monoxide averages and related statistics are available at Vallejo-304 Tuolumne Street between 1975 and 2012. Some years in this range may not be represented.

All averages expressed in parts per million.

An exceedance of a standard is not necessarily related to a violation of the standard.

Year Coverage indicates the extent to which available monitoring data represent the time of the year when concentrations are expected to be highest. 0 means that data represent none of the high period; 100 means that data represent the entire high period. A high Year Coverage does not mean that there was sufficient data for annual statistics to be considered valid.

■ means there was insufficient data available to determine the value.
