Fourth High:	Sep 27	0.002		*		*
Annual Average:		0.000		0.000		*
Year Coverage:		94		94		60

Notes:

Hourly sulfur dioxide measurements and related statistics are available at Vallejo-304 Tuolumne Street between 1975 and 2012. Some years in this range may not be represented.

All averages expressed in parts per million.

An exceedance of a standard is not necessarily related to a violation of the standard.

Year Coverage indicates the extent to which available monitoring data represent the time of the year when concentrations are expected to be highest. 0 means that data represent none of the high period; 100 means that data represent the entire high period. A high Year Coverage does not mean that there was sufficient data for annual statistics to be considered valid.

■ means there was insufficient data available to determine the value.
