NOTIFICATION OF ODOR

*Information Only

The Valero Refinery informed the Benicia Fire Department that there is an issue with one of their tanks causing an odor in the area. Valero staff are working to resolve the issue, and the current estimate is that it will be resolved within the next hour.

Benicia firefighters were dispatched to test various spots in the city with high quality portable air monitors. The readings are below actionable limits. Benicia Fire Department staff will continue to monitor the situation. Based on air monitor readings, we currently do not anticipate any off-site health impacts.

We will notify the community if there are any significant changes.
