Water-conserving Plumbing Fixtures
Single Family Residential Properties

Per California Civil Code Sections 1101.1 – 1101.8, effective January 1, 2014, when a building permit is issued for alterations or improvements to single family residential buildings, ALL non-compliant plumbing fixtures in the home shall be replaced with water conserving plumbing fixtures as a condition of final inspection approval.

Non-compliant plumbing fixtures are defined as follows:

1. Any dual flush toilet manufactured to use more than 1.6 gallons per flush.
2. Any single flush toilet manufactured to use more than 1.28 gallons per flush.
3. Any interior faucet that emits more than 2.2 gallons of water per minute 60 psi.
4. Any showerhead manufactured to have a flow capacity of more than 2.5 gallons per minute at 80 psi.
5. Any urinal manufactured to use more than 1 gallon of water per flush.

Property address: _____ Building Permit # _____

New construction must comply with the current California Green Building Standards Code for water conservation requirements.

I hereby certify that all plumbing fixtures within the building meet the standards of “water conserving fixtures” as defined by California Civil Code Section 1101.3.
