Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Please reject Valero's dangerous plan! These trains have caused environmental spills and disasters all over the U.S., ruining water ways, drinking water, land, natural resources. Don't do it! This is a nice community in Martinez, that already has HUGE air pollution problems and an extremely high cancer rate as a result!

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

No new infrastructure for a practice that needs to be outlawed. Fracking is an insane attempt to poison our planet faster than ever for profit in the face of clean fuel alternatives. Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I am asking the Planning Commission and the City Council to reject Valero's plan to build an oil trains facility in Benicia. Huge explosions of rail cars carrying oil have been in the news for several years. This would endanger the community of Benicia as well as others along the rail lines that are powerless to control rail traffic because of federal pre-emption. In addition to the local pollution, these trains would carry "extreme crude," from fracking and tar sands, which significantly impact climate change--we need to reverse, not accelerate, this process.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train deraiment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicio and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicio and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan. We in surrounding Solano County areas are at your mercy. PLEASE STOP THIS DANGEROUS PLAN.

Subject: Reject Valero's dangerous oil trains project

Fracking is a pernicious and dangerous practice on many levels. Allowing an oil trains terminal in Benicia simply encourages the oil industry to continue fracking. In addition, Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

My family and I lived in Benicia for seventeen years before moving to our present location. We still have friends there plus family in Davis. We pray for their safety and so am signing onto this petition. Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Support -Valero Crude by Rail Project

Dear City of Benicia Representatives,

I am writing to express my **support** the Valero Crude by Rail Project. I could cite a number of economic reasons why I support the project but I am sure that you are familiar with them. Instead, I would like to point out that I vote in every election and even though you are not elected officials, the direction of city government is influenced by the popular vote. The city government and its polices must reflect the citizens needs. Benicia and the Bay Area need Valero's contribution to the economy and to vital resources. Valero has demonstrated itself to be an honest and sincere member of the community and I am certain that this project will be completed and operated in a safe and responsible manner.

In conclusion I would like to reiterate my **support** for the crude by rail project.

Oil trains kill people. An oil trains terminal in Benicia is far too close to me in Oakland, and even closer to your families and neighbors.

Please don't make our air quality worse and make us wait for the inevitable catastrophic derailment. Please don't do anything that will make our state more, rather than less, dependent on oil, and especially fracking during an anticipate decade-long drought.

Please reject Valero's dangerous plan. I am counting on you to do the right thing.

Debbie Notkin

The infrastructure on train rails has not been suitably kept up over the decades. Moving such toxic substances over a system that has been consistently shortchange on its upkeep is like playing Russian roulette but periodically adding extra bullets.

Pressure Congress into keeping up infrastructure and maybe those very real dangers of a train jumping its tracks and dumping its toxic loads where people do not want it.

Additionally tracking is sustainably a poor choice. It damages tectonic plate stability.

Subject: Reject Valero's dangerous oil trains project

Please do not allow Valero to build an oil trains terminal at its refinery in Benicia! It threatens the health and safety of people all along the rail route. I love Benicia and hate to see it be the cause of polluting the bay area, endangering its neighbors, and contributing to the pollution of our planet.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route, and ultimately, as well as all the people on this planet! All of this can be avoided if the Benicia City Council rejects this reckless and dirty proposal from Valero. I hope that the members of the City Council have taken the time to thoroughly study what is involved in the "Fracking" process. There is no amount of money that can justify taking the risks that this proposal suggests. We elected the City Council to represent THE PEOPLE! And the Council needs to remember that they are there to preserve and protect the people. The Council is responsible for decisions that will put thousands of people in danger. The proposal will also delay the change-over to renewable energy sources. We have already delayed converting to safe and renewable energy for far too long. We may have delayed beyond the point where we can save our planet from destruction. I urge the Council to heed the scientists, educators, physicians, and other experts who overwhelmingly support the switch to renewables. Any action that postpones or delays our conversion to renewable energy is just plain dangerous and WRONG! Please help preserve our Mother Earth; we will not survive without our Mother.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Public Comment on Valero Project

Dear Ms. Million,

Please enter the following comments on the Benicia Valero Refinery Project RDEIR into the public record.

The RDEIR raises many environmental and human health concerns, but then repeatedly lapses into "federal pre-emption." This is tantamount to admitting that the city of Benicia and Valero essentially have no control over these aspects of the project. Instead of using this "pre-emption" as reason to approve the project "as is," a responsible Planning Commission would see this lack of control and ability to regulate various aspects of the project as a reason for rejecting it. It is difficult to imagine why citizens would want a dangerous project in their midst over which they cannot have any real oversight.

It is even more difficult to imagine how the Planning Commission and City could approve a project with admittedly "potentially significant" environmental impacts and "unmitigatable" hazards to human life. These hazards and impacts are not described in any detail in the RDEIR, either as to their nature or what might conceivably be done to address them if they do occur. There are very hazardous sections of track uprail, through the Sierra, and through the city of Sacramento. What effects would a spill into rivers or onto mountain passes have? How could such a spill possibly be cleaned up? A spill could ruin sensitive natural areas and/or poison the drinking water of thousands of people, yet there is no program in place to at least try to address a spill. Most fires from oil train explosions around the country have had to simply be left to "burn out." Is that really a possibility if there were an accident in Sacramento? And what about accidents in the refinery loading area itself? Could the citizens in the area be exposed for days to the hazards and toxic emissions of a fireball burning out? Should the public be forced to accept that such accidents are just "unmitigatable" and that the possibility must therefore be ignored?

The RDEIR also states that the main routes to be used between the refinery and the state line have been upgraded to include Positive Trail Control (PTC). However, citizens have been given no details or confirmation that this has indeed been done. National reports show a widespread lack of effort and progress in implementing PTC by the end of 2015. In fact, there are currently railroad lobbying efforts to extend the deadline. The public should have written description and confirmation that Union Pacific has actually upgraded the routes concerned to include PTC.

The safety of the rail tank cars themselves is not adequately addressed in the RDEIR, either. It does not specify whether or not Valero and Union Pacific will upgrade the cars by 2020 to the new 117 tank car designed for "high hazard" flammable crude. But that may not be significant in light of the fact that the RDEIR states that although "the updated tank car designs reduce the overall risk, the impact [of an accident] would remain significant." In other words, Valero admits there is absolutely no way proven safe to transport this crude oil.

Thank you for including these comments in the public record.

Sincerely,
Carol Warren

Subject: Reject Valero's dangerous oil trains project

I sincerely urge Benicia's Planning Commission and the City Council to reject Valero's dangerous plan.

I would also like to thank Valero for their continued support of the arts in Benicia's community and suggest the company become a leader in exploring a shift towards sustainable energy. The argument for these dangerous trains is to 'create jobs'. Brilliant young scientists are going to Europe where there are opportunities to build green energy systems. If Valero were to think long term and put their resources into leading this shift, their example would gain respect and acclaim worldwide. Many more important jobs would be created and the risk to be on the environmental disaster list with BP and Exxon would disappear.

Subject: Reject Valero's dangerous oil trains project

We do not need to invite another Lac-Mégantic type disaster in Benicia or anywhere leading up to it. Having personally followed day after day the discovery of a wide swath of destruction, the horror of maimed, charred and incinerated beyond identification of the remains of many of the victims, I probably have a better idea than most Californians what the derailment of a major oil train can mean for populated centers along the line tracks.

The building of a massive oil train terminal in Benicia by itself alone is an invitation to a re-enactment, in Benicia or many other, equally vulnerable California communities, of Lac Mégantic's or any of the other nine major oil train explosions in the US since 2013 and many more abroad. It is not a matter of if but when.

Besides, does the Council really want Benicia to become known, statewide and internationally, as the California City most encouraging to toxic polluters?

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction, which contaminates the product with dangerous toxic chemicals, fouling not only the air by their fumes but the soil itself they impregnate.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

Subject: Reject Valero's dangerous oil trains project

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan. Obviously, this is not the direction you want for your community, since it would be a suicidal move -- you could get blown right off the map when the Hayward Fault rips apart, not to mention the daily exposure to toxins by your populace. Gee, what kind of future would that provide? Think of the long-term consequences for your town, and many other communities, rather than any short-term perks Valero may be offering you. There is too much at stake to make the wrong, foolish decision.

Subject: Reject Valero's dangerous oil trains project

I urge the Benicia Planning Commission and City Council to reject Valero's dangerous plan to build an oil train terminal at its refinery in Benicia.

This proposal threatens the health and safety of people all along the rail route. If Benicia allows the plan to go forward, the terminal will increase local air pollution in Benicia. Even worse, it, expose it and the other communities along the route to the the risk of a catastrophic oil train derailment and explosion,. It will also worsen climate change by encouraging fracking and tar sands extraction.

Please vote against Valero's dangerous plan.

Or - if you truly feel that the benefits to Benicia of allowing Valero to refine refining fracked oil brought in by rail would outweigh the costs and risk, please, in the interest of protecting your people from unacceptable danger, REFUSE to give your approval until AFTER the railroads have made all the upgrades to their cars and systems needed to eliminate your city's exposure to catastrophic crashes and explosions.

Do the real cost benefit analysis. Don't let Valero bamboozle you into doing anything less than what is truly in your city's best interest.

Christine Rosen

California and the rest of the nation is experiencing first hand the results of global warming. The oil and gas industry does not care what damage is being done to our climate, homes and businesses as long as they meet their profit goals. It is time that all of us stand together and tell them no. No more expansion whether it be the building of a terminal or more fracking. They have know for decades that fossil fuels are causing global warming and now it is time for them to use their resources to transition our economy to clean energy. The transition will need to happen at some point and the sooner the better.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan and give all of us hope for a future.a

Dear Benicia Planning Commission and City Council. When you decide on the issue of Valero's proposal to build an oil trains terminal at its refinery in Benicia, please remember that you are not only deciding for the city of Benicia. You are making a decision which affects the lives, safety and environment of all of us who live directly along the train route.

Besides, this land is our heritage. The train route travels through some of the most spectacular landscape in the world and we no not have the right to destroy it with the chance of a train derailment, oil spill or explosion. Please reject Valero's dangerous plan.

I am against Valero's proposal to build an oil train terminal at its refinery in Benicia as it threatens the health and safety of people of Benicia and all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.

If the Council does not reject the Application, please require the Valero facility to only accept oil trains that are equipped with the most safe and updated rail cars and crews. Also, require the Valero facility to pay the City for the cost of expert enforcement inspectors and Benicia Firefighter training. Also, require very strict and costly enforcement penalties to ensure they NEVER violate the trust of the City Council.

Given the impact of global climate disruption, and the huge part played by oil, how long do you think oil will continue receiving subsidies that make this oil trains approach will remain economically viable? Now, cut that estimate in half because various fees (whether cap & trade, fee & dividend, or just a pollution tax) will quickly follow the cutting of subsidies.

Valero's outrageous proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

A new study from the Harvard School of Public Health finds that carbon dioxide (CO2) has a direct and negative impact on human cognition and decision-making (10-26-15). Do you want your children, grandchildren and yourself, for that matter, living under the negative impacts of more CO2 in the already polluted poor air in the area? (I lived in Vallejo for many years, so I'm familiar with the air in the area.) Any newly-built fossil fuel infrastructure locks in the extraction and transport of the dirty fuel for the next 20, 30, 50 years when we direly need to be going in the opposite direction.

Valero's "short-sighted" proposal to build an oil trains terminal at its refinery in Benicia threatens the health and safety of people all along the rail route.

If approved by the Benicia City Council, the terminal would exacerbate local air pollution in Benicia and in communities along the rail route, expose those communities to the catastrophic danger of an oil train derailment and explosion, and fuel the climate crisis by encouraging fracking and tar sands extraction.

I urge the Planning Commission and the City Council to reject Valero's dangerous plan.
