

Statement of Candidate for
Member of City Council
City of Benicia

Terry Scott

Occupation: Retired

Education and Qualifications: Earned a B.S. degree from Kent State University; attended Tuck School of Business, Dartmouth for Executives Studies.

I can bring to Council a proven record of innovation, financial responsibility, wisdom and business experience. I have earned leadership. I've been an entrepreneur and a consultant. I've run family-owned businesses. I've spent decades in senior leadership roles in corporate America. I have succeeded and failed. I kept learning. Over the years, I have realized that listening is the greatest people skill necessary to be successful. I will bring the vision, insight and creativity to help us understand our financial and quality of life issues. These are the needed qualities which an effective Council member must have.

If elected, I will help City Council maintain the small-town quality of life we expect including effective police and fire departments; financial responsibility; fair water and sewer rates and improving deteriorating roads. In addition, we enjoy a strong artistic community. It's one of our biggest resources. They should not be ignored but encouraged. All while we navigate through the challenge of change in a post COVID-19 recovery.
